

2022 Sustainable Development Goals (SDG) content index for BCE Inc.

The Sustainable Development Goals (SDGs) are part of a global agreement called the 2030 AGENDA, adopted at the United Nations in 2015 to address some of the world's biggest challenges.

How Our Business is Supporting the UN Sustainable Development Goals (SDGs)

Our sustainability strategy is designed to support our Strategic imperatives. Some of our efforts also address some of the world's biggest challenges: lack of access to education, growing inequality, high youth unemployment, unprecedented migration and conflict, market disruption caused by technology and artificial intelligence, and pressure on our natural resources. By supporting the SDGs, we believe that we will help create a better world in which our business can grow.

For Bell, operating responsibly is an important first step to supporting progress across the SDGs. Beyond that, we have identified 13 SDGs where we believe we have the opportunity make an impact through our business practices, products and services, programs, and partnerships. Of the 169 targets within the 17 SDGs, we contribute to 25.

There are many voluntary guidelines and frameworks for reporting corporate sustainability information.

Bell supports the development and evolution of such frameworks, and seeks to report on topics that align with our business model and corporate reality.

In some cases, indicators suggested by the framework are not applicable, or the information is considered to be competitive and is therefore not disclosed.
